

# CUP GUARD

## SAFE SELF-SERVICE USE, THANKS TO AUTOMATIC DOOR LOCKING.

The ideal coffee machine combines unbeatable quality with effective safety. Available as an option with the WMF 5000 S+ and the WMF 1500 S+, the Cup Guard locks automatically while a drink is being dispensed, protecting users against the risks of burning and splashing. That makes it especially useful in self-service venues. So your customers enjoy maximum safety, as well as outstanding coffee quality.

**DESIGNED TO PERFORM**

## HOW THE CUP GUARD WORKS

The self-closing WMF Cup Guard is a splash-proof door which protects users against the risk of burning or scalding, guaranteeing the utmost safety in your venue. Available as an option with the WMF 5000 S+ and the WMF 1500 S+, the WMF Cup Guard is automatically locked by an electromagnet while a drink is being dispensed, and cannot be reopened until the beverage is ready. For additional protection, cyclical rinsing or starting the cleaning process is only possible when the WMF Cup Guard is closed.

## AVAILABLE FOR:

WMF 5000 S+ \*

WMF 1500 S+ \*

\* Not available for retrofitting.

## YOUR BENEFITS OF THE CUP GUARD:

- **PROTECTION AGAINST SPLASHING:**  
The Cup Guard eliminates the risk of splashing during beverage dispensing.
- **PROTECTION AGAINST BURNING:**  
As dispensing occurs behind the Cup Guard, there is no risk of the user being burned.
- **AUTOMATIC LOCKING DURING DISPENSING:**  
The Cup Guard remains locked until dispensing is complete, so users cannot accidentally remove a beverage early.
- **AUTOMATIC LOCKING DURING CLEANING:**  
Locking also occurs when cyclical cleaning begins or cleaning is activated manually.
