

WMF AUTO CLEAN

THE INTELLIGENT CLEANING SYSTEM, ENGINEERED FOR FULL AUTOMATION.

In a groundbreaking, labour-saving new development, manual cleaning of the coffee and milk systems of our Professional Coffee Machines has become a thing of the past. Just configure the cleaning cycle once and the WMF AutoClean system does the rest, independently and automatically. By automating the cleaning process, the WMF AutoClean system further extends the list of innovations introduced by WMF to save time and effort, increasing the profitability of your professional coffee machine.

DESIGNED TO PERFORM

HOW THE COFFEE SYSTEM CLEANING WORKS

WMF AutoClean eliminates the need for manual cleaning of the coffee system. Cleaning granulate is stored in the machine and dosed automatically; the cleaning granulate only need to be replaced once every 60 cleaning cycles. After the cleaning cycle has been configured - a simple process that only needs to be done once - the machine will clean itself automatically at the chosen time, with no manual intervention. When cleaning is complete, the machine is instantly ready for use again.

HOW THE MILK SYSTEM CLEANING WORKS

The milk system cleaning process also starts fully automatic. To reduce downtime, the daily rinsing of the milk tube can be done during milk refilling. Just attach the milk tube to the adaptor and rinsing starts automatically, without the need for any additional effort by an employee. What's more, the liquid that cleans the milk system is dosed automatically, and cleaning liquid only need to be replaced once every 40 cleaning cycles.

AVAILABLE FOR:

WMF 5000 S+

YOUR BENEFITS OF WMF AUTO CLEAN:

- **ADVANCED AUTOMATION:**
The WMF AutoClean system eliminates the need for manual effort, for example after a hard day at work.
- **FULLY AUTOMATIC CLEANING:**
Cleaning of both milk and coffee systems starts and proceeds automatically. Even the dosing of cleaning granulate and liquid is automatic and precise.
- **ONE-TIME CONFIGURATION:**
For maximum reliability, the cleaning cycle only needs to be defined once.
- **60 CLEANING CYCLES BEFORE RESUPPLY (COFFEE SYSTEM)**
Granulate for the coffee cleaning system only requires replacing after 60 cycles.
- **40 CLEANING CYCLES BEFORE RESUPPLY (MILK SYSTEM)**
Liquid for the milk cleaning system only requires replacing after 40 cycles.
- **PARALLEL RINSING OF THE MILK HOSE DURING REFILLING:**
The milk hose is rinsed during milk refilling, reducing downtime.
